

Barnabás Kiss

Programmer

I'm a Full-Stack Programmer with 5+ years of experience. I've worked with multiple studios and I'm looking for a role where I can continue to expand my knowledge.

Experience

Bulk Games

Senior Software Engineer

August 2021 – Present

At Area-47, I am responsible for the programming involved in creating new content updates for an experience with over 37M visits and an active community.

- Lua Development
- Backend Development
- Web Development

CreepySins Studios

Freelance Web & Backend Dev

October 2020 – September 2021

Performed development using technologies such as React, Node, Express.js, Firebase, and more.

Worked on projects such as:

- Application Centre Backend
- Studio Website
- Feature-Flag System (Control Panel & Backend)
- Appeal System

Baumschule von Ehren

Freelance Full Stack Developer

November 2018 – April 2021

Leveraged technologies such as React to write software to help with the logistical management of the company's truck fleet.

- Developed a suite of customized, enterprise-grade software
- Provided constant updates for new features
- Software written directly contributed to increased logistical efficiency

Baumschule von Ehren

Freelance Mobile App Developer

October 2020– April 2021

Developed mobile software to integrate with previous written systems. Worked with new technologies such as Flutter to deliver high-performing apps.
